Rate Disclosures

The ASU Graduate Status Report for Calendar Year 2014 is a summary of the pre- and post-graduation surveys for graduating classes of May, August, and December 2014. All information is self-reported by the graduates.

Methodology

Two weeks prior to graduation, students were provided paper graduation surveys for May and August graduations and an electronic survey two weeks before December graduation as the students picked up their cap and gowns for their respective graduation programs. Surveys were completed on a voluntary basis are part of the Senior Exit Survey. All data were imported into an excel file created by the Office of Institutional Research and Planning and Office of Assessment as the official repositories of data. Student identification numbers are used and verified by the Registrar's Office to prevent duplication of surveys by the same person and to identify those who have not completed the survey.

Column Descriptions

Column information: "Number of Graduates" information was provided by the Registrar's Office from the the students' application for graduation. "Reponded to Survey" are the number of surveys returned in usuable format by the respondents. "Employed Full-time", "Employed Part-Time", "Seeking Employment", Admitted into Graduate School" and "Not Seeking Employment" are categories graduates checked to reflect their status at the time of completion of the survey. Graduates can only check one of the boxes to avoid duplication of information. Salary information on the survey document was presented in ranges. "Salary Ranges Reported by Graduates" reflects the number of responses by respondents for that particular range of salaries for the indicated major.

Post-Graduation

Post-Graduation data for May, August, and December 2014 are included in the data. Students received email requests in early August for the May 2014 graduates,early November for the August 2014, and spring 2015 for December 2014 graduates to complete and return via an online survey.
