EXPENSES
Classes for new CVI students begin every fall semester and run for 12 consecutive months. During the 12-month program, students participate in a structured rotation sequence through affiliated CVI departments in Northeast Arkansas, Memphis, Tenn. and Northwest Mississippi.

Students must provide their own transportation to the clinical affiliates. When determining educational costs, consideration should be given to this additional expense. Students are not compensated for clinical education hours.

The CVI program is an equal opportunity educational program and does not discriminate based on age, color, race, or religious practices.

EXPENSES
In addition to tuition and immunization costs, radiation therapy students will incur the following expenses:

1. All students in the College of Nursing and Health Professions must purchase malpractice insurance prior to rotating through clinical sites. The annual cost of this insurance is between $35 and $100.

2. The cost of textbooks will vary each semester, with a majority of the total cost occurring in the first semester of the professional program. Textbook costs for the first semester may be as much as $350. These texts are used throughout the program.

3. Uniforms costs are approximately $200, with dosimeter costs also estimated at $100 per year.

4. CPR, BDLS, ACLS certifications and an EKG course are required, and each may charge a nominal fee.

5. Background checks are required for clinical students. This cost is between $50-$100. A drug screen is required for certain clinic sites, with a cost between $25-$45.

6. Students are required to purchase access to online clinical software for use in clinical courses. This is a one-time fee of approximately $100.

7. TB mask fittings are required. The fitting is available at A-State within the first few weeks of the fall semester. This is a one-time fee of approximately $25.

IMMUNIZATION & HEALTH RECORDS
Once accepted into the program, students must provide documented evidence of vaccination and immunization for Hepatitis B and Varicella (chicken pox).

Students must be up-to-date on all vaccines required by the CVI program clinical affiliates including TB skin tests, the flu vaccine, and HEPA mask fittings.

CARDIOVASCULAR INTERVENTIONAL PROGRAM
Dept. of Medical Imaging and Radiation Sciences
College of Nursing and Health Professions
Arkansas State University
P.O. Box 910
State University, AR 72467
Nursing and Health Professions Building, Room 419
Jonesboro, Ark.
Phone: (870) 972-3073
Fax: (870) 972-3485
MISSION OF THE CARDIOVASCULAR INTERVENTIONAL (CVI) PROGRAM
The mission of the CVI track is to prepare competent, entry level CVI technologists able to function within the healthcare community.

GOALS
Students will be clinically competent.
Student Learning Outcomes:
- Students will properly apply and maintain sterile fields.
- Students will perform interventional procedures accurately.
- Students will practice acceptable radiation safety techniques.

Students will demonstrate communication skills.
Student Learning Outcomes:
- Students will demonstrate written communication skills.
- Students will use effective oral communication skills.

Students will develop critical thinking skills.
Student Learning Outcomes:
- Students will adapt interventional techniques to varying clinical scenarios.
- Students will respond quickly and appropriately to life threatening situations.

Students will model professionalism.
Student Learning Outcomes:
- Students will understand professional ethics.
- Students will demonstrate professional conduct.

WHAT IS CARDIOVASCULAR INTERVENTIONAL TECHNOLOGY?
Cardiovascular interventional technologists are members of the radiology team who work alongside interventional radiologists and cardiologists. The CVI technologist assists with diagnostic angiographic procedures, as well as complex vascular and nonvascular interventional and therapeutic procedures.

CVI technologists are responsible for obtaining all equipment needed for a procedure, positioning and imaging patients, resolving equipment issues, and demonstrating knowledge of human anatomy, radiation safety, interventional supplies and equipment operation.

Ideal Traits for CVI Technologists:
- Ability to work with a team
- Attention to detail
- Love for trauma and human anatomy
- Enjoyment of critical thinking/problem solving activities

SELECTIVE ADMISSION REQUIREMENTS FOR SPECIALTY
To be eligible to apply to the CVI specialty track, students must:
- Have graduated or be currently enrolled in an accredited radiography program
- Have completed prerequisite coursework
- Have no contraindications that would prohibit working in a CVI suite

Applicants to the CVI specialty track are selected by the Admissions Committee using the following criteria:
1. Cumulative grade point average (20 points possible toward 107 maximum points)
2. Selected course grades (20 points possible toward 107 maximum points)
3. Interview (30 points possible toward 107 maximum points)
4. Modality clinic evaluation form (33 points possible toward 107 maximum points)
5. A-State students (4 points possible toward 107 maximum points)

CVI PROGRAM
Completion of general education, selected coursework, radiography program courses, and CVI specialty track coursework will lead to a Bachelor of Science in Radiologic Sciences (BSRS) degree and eligibility to sit for the American Registry of Radiologic Technologists (ARRT) certification exams in radiography, CI or VI (clinical competencies must be met in order to sit for the CI or VI certification examination).

BSRS DEGREE HOUR SUMMARY
First-Year Making Connections course 3
General education requirements 35
Major requirements (radiology program) 54
Emphasis area requirements (CVI) 39
Required support courses 4
Total hours 135

CVI PROFESSIONAL CURRICULUM
Following Radiography Program courses, the following CVI specialty track coursework will be completed:

Fall
- RS 4423 CVI Procedures & Instrumentation
- RS 4413 CVI Equipment and Intervention
- RS 4454 CVI Clinical Education
- RS 4463 Statistics for Medical Imaging*
- RSMR 4712 Imaging Info Management*

Spring
- RS 4443 Cardiac Physiology and Procedures
- RS 4433 Cardiac Equipment and Intervention
- RS 4444 Cardiac Clinic
- RS 4822 Psychosocial Factors Health Care*
- RS 4343 Radiologic Admin. Concepts*

Summer
- RS 3733 Geriatrics in Radiology*
- RS 3122 Legal and Regulatory*
- RS 4464 CVI Internship

*Distance education courses may incur additional expenses for the student. Online courses are subjected to fees determined by a third party administrator.
