

# Download and Install GlobalProtect for Mac OS

**Step 1:** Log in to the GlobalProtect portal. Launch a web browser and go to the following URL:  
<https://globalprotect.astate.edu>

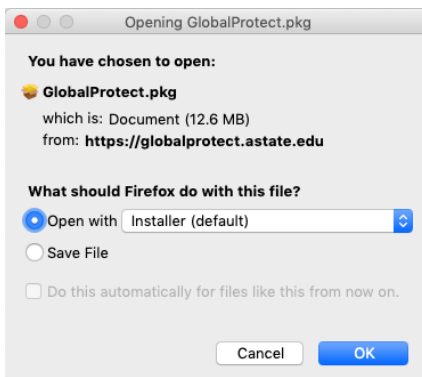

**Step 2:** On the portal login page, enter your AState Username and Password and then click LOG IN

**Step 3:** Download the app. Click "Download Mac 32/64 bit GlobalProtect agent".

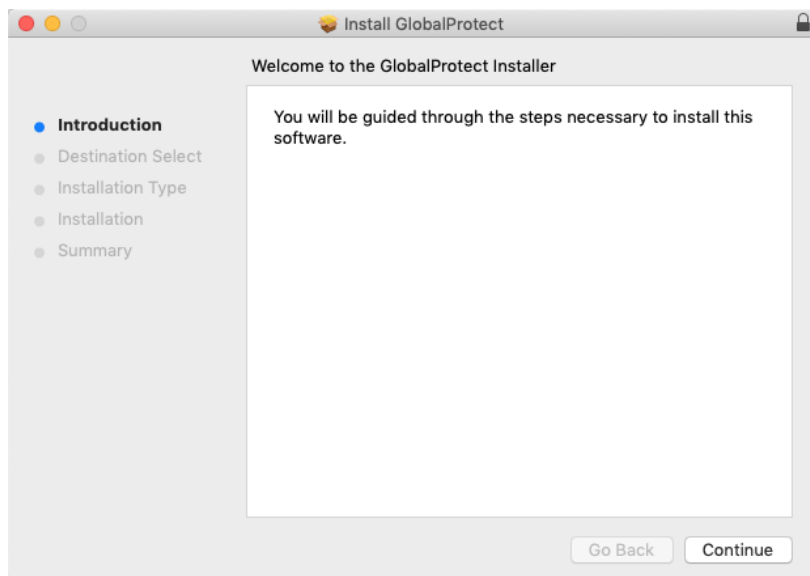

**Step 3:** When prompted, Open or Run the GlobalProtect Installer

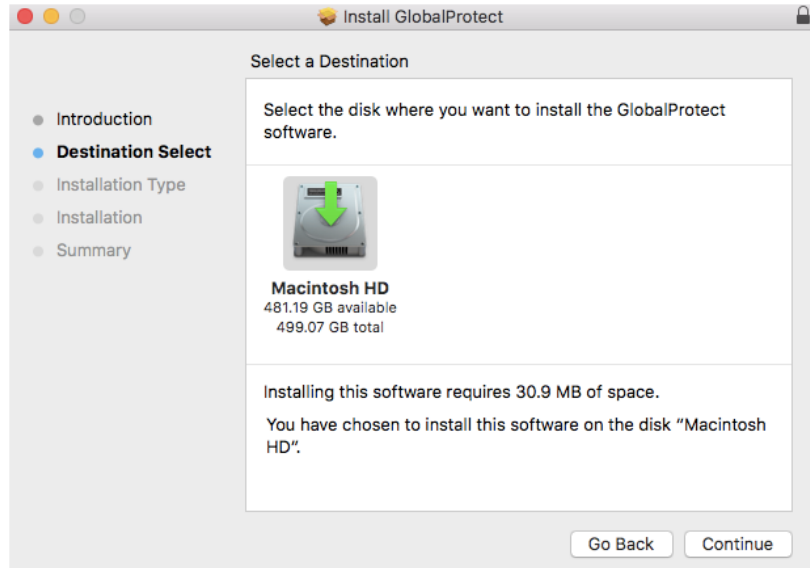

**Step 4:** Complete the GlobalProtect app setup using the GlobalProtect Installer.

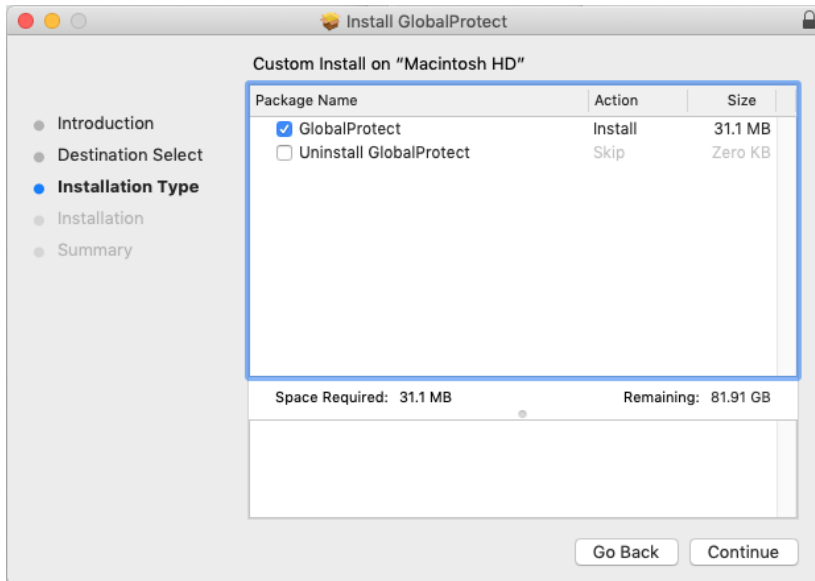

1. From the GlobalProtect Installer, click Continue.

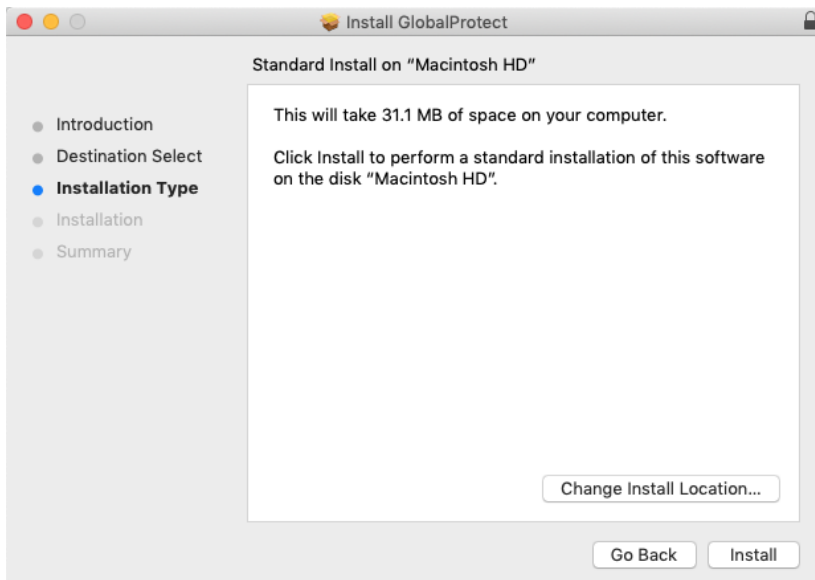

2. On the Destination Select screen, select the installation folder for the GlobalProtect app, and then click Continue.

3. On the Installation Type screen, select the GlobalProtect installation package check box, and then click Continue.

4. Click Install.

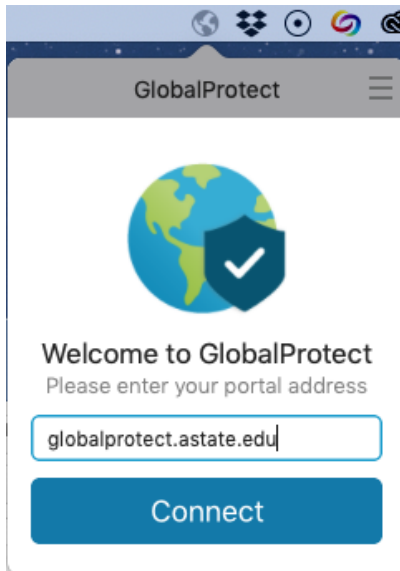

5. When prompted, enter your computer User Name and Password, and then click Install Software to begin the installation.

6. When prompted, open your Security Settings to allow the app from Palo Alto.

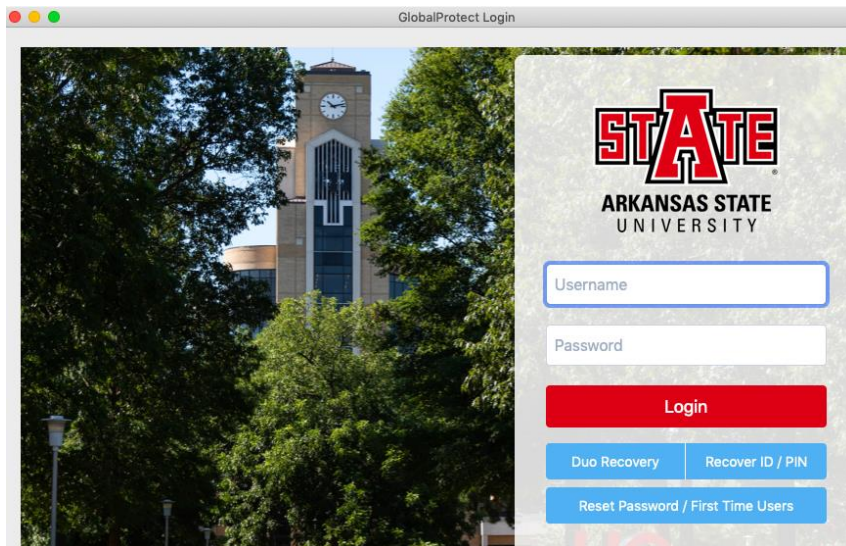

7. After installation is complete, Close the installer.

**Step 5:** Log in to GlobalProtect.

1. Launch the GlobalProtect app by clicking the system tray icon. The status panel opens.
2. Enter the Portal address `globalprotect.astate.edu`, and then click Connect.

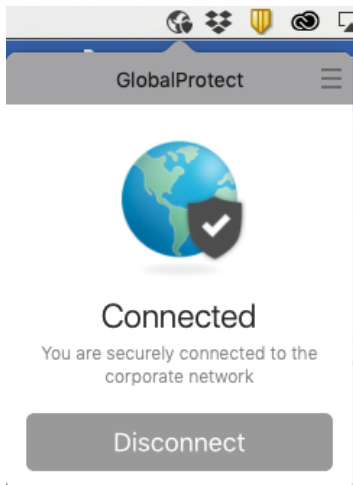

3. When prompted, enter your AState Username and Password. Complete the DUO authentication.

**To Disconnect when you are finished using the VPN connection.**

**Step 1:** Launch the GlobalProtect app by clicking the system tray icon. The status panel opens.

**Step 2:** Click Disconnect
