

ARKANSAS STATE UNIVERSITY GOVERNING PRINCIPLES FOR EXTERNALLY SPONSORED PROGRAMS

1.0 INTRODUCTION

Arkansas State University (ASU) is committed to the pursuit of knowledge that enhances the world's store of information. In pursuing this goal, the University has designated the Office of Research and Technology Transfer to assist its personnel in securing and managing external funding to support research and other scholarly activities.

In the pursuit of its research mission, the University affirms that it does not discriminate against prospective or current students, prospective or current employees, or against individuals in affiliated organizations on the basis of race, religious creed, color, national origin, ancestry, physical or mental disability, medical condition, marital status, sex, age, sexual orientation, gender identity, veteran status, or any other characteristic protected by law. ASU likewise affirms its commitment to an open research environment whenever practicable, supporting the principle of freedom of access to data, processes, and results of research and preserves the faculty's right to select the best qualified employees and students to participate in University-sponsored research.

2.0 PURPOSE

The purpose of these principles is to: 1) affirm the University's commitment to maintaining an open and non-discriminatory research environment; 2) identify the Office of Research and Technology Transfer as the office designated to manage the institution's research effort; 3) establish eligibility standards for principal investigators, co-principal investigators, and project directors; 4) to facilitate preparation and submission of grants and contracts to external sponsors; and 5) ensure compliance with regulations prior to submission.

3.0 DEFINITIONS

Authorized University Representative: An employee who is recognized by ASU as an official signatory to approve all grant, contract, and other agreement activity with external sponsors.

Business Day: The standard University administrative workday (8:00 a.m. – 5:00 p.m.) that is not a national or University holiday or a weekend.

Co-Principal Investigators. Co-Principal Investigators are individuals who share responsibility for the scientific or technical direction of all or a portion of a project.

Cost Sharing or Matching. Cost sharing or matching is when the institution shares the expense of a sponsored project. Cost shares must be funded from non-federal sources and charged to

separate cost sharing accounts. Gift funds may be used to meet a cost sharing commitment on a sponsored project if the purpose of the gift so allows. Cost sharing represents a commitment that, once made, represents a binding obligation and is considered an auditable expense.

Electronic Submission: Delivery of a proposal to a sponsor using the Web or Internet.

Equipment Loan Agreements. Equipment loans agreements are negotiated when a sponsor lends equipment to the University for research purposes. This type of agreement usually does not involve the exchange of funds, but enables ASU and industry researchers the opportunity to use each other's facilities.

Facilities and Administrative Costs (F&As). F&As are broad categories of costs that are incurred for common or joint objectives and cannot be identified readily and specifically with a sponsored project, an instructional activity, or any other institutional activity. "Facilities" refers to depreciation and use allowances, interest or debt associated with certain buildings, equipment and capital improvements, and operation and maintenance expenses. "Administration" is defined as general administration and expenses, departmental administration, sponsored projects administration, student administration and services, and all other types of expenditures not listed specifically in one of the subcategories of Facilities (including cross allocations from other pools.¹

Institution. Any domestic or foreign, public, or private entity or organization excluding a federal agency. For the purposes of this policy, the term *Institution* refers to ASU.

Material Transfer Agreements. (MTAs). MTAs are contracts by which tangible research property (e.g., biological organisms) is provided by external sources to ASU investigators for research, or by ASU investigators to external researchers. Material Transfer Agreements are processed as sponsored research projects.

Organized Research. Organized research activities are funded by both external sponsors (Sponsored Research) and by the University (University Research), and must be separately budgeted and accounted for. Together, these categories comprise the Organized Research distribution base, used to calculate the Organized Research F&A rate.

Principal Investigator (PI)/Project Director (PD). Often used interchangeably, these two terms refer to an individual who assumes full technical and fiscal responsibility for a sponsored project, including the supervision of other key personnel, research assistants, students, and staff. A Principal Investigator must have sufficient experience to responsibly manage the project and must be an employee of the University. Throughout this policy, the term *Principal Investigator (PI)* will also refer to the term *Project Director (PD)*.

¹ OMB Circular 21, Revised 5/10/04.

Research Participation Agreements. Research Participation Agreements (RPA) is a type of sponsored program in which services of institutional personnel, academic facilities, and/or laboratory equipment are employed on behalf of parties not otherwise affiliated with the University. In many cases, a significant portion of the responsibility for the intellectual direction, interpretation, and/or outcome of the work rests with the outside user.

Scope of Work. A written statement specifying the tasks (including deliverables) to be completed for a specific project, cost, and period of performance.

Sponsor. Any governmental agency, private foundation, corporation, or association that provides financial project support.

Sponsored Program. A research project, program, scholarly activity, or community service project for which an external agency has provided financial support and for which a formal written agreement exists, specific outcomes or deliverables are expected, and technical and financial reports are required.

Subcontract. A subcontract is a formal contractual agreement with a participating organization for research collaboration and/or services under sponsored-program projects. The term does not apply to the normal procurement of supplies and research equipment.

University Research. University Research is scholarship and/or creative activities that are paid for with institutional funds. Institutional funding may include state funds, tuition and fees, gifts, endowment income, interest income, and technology licensing income.

4.0 APPLICABILITY

This policy applies to all ASU faculty, staff, and administrators who seek external support for research grants, contracts, and agreements from external sponsors. It does not govern the receipt of philanthropic contributions or clinical trial agreements.

5.0 APPLICABLE REGULATIONS

University Conflict of Interest/Commitment Policy

Governing Principles for University Effort Reporting

6.0 GOVERNING PRINCIPLES

6.1 Non-Discrimination and Openness in Research

ASU does not discriminate against students, employees, or individuals in affiliated organizations on the basis of race, religious creed, color, national origin, ancestry, physical or mental disability, medical condition, marital status, sex, age, sexual orientation, gender identity, veteran status, or any other characteristic protected by law. The University is likewise committed to an open, non-

discriminatory research environment that supports freedom of access by all interested persons to data, processes, and results of research whenever practicable.

6.2 Project Submission

Proposals for extramural support of research, training or public service projects may be submitted only by ASU employees who:

- A. have primary responsibility for design, execution, and management of the project,
- B. will be involved in the project in a significant manner, and
- C. will serve as the Principal Investigator, Co-Principal Investigator, or Project Director for a research, training, or public service project.

All requests for support and award acceptance from external sponsors must be submitted to and approved by the Associate Vice Chancellor for Research. Deans, Department Chairs, and individual faculty or staff members are not authorized to submit applications for grants or contracts, nor to accept awards, contracts, subcontracts, or agreements on behalf of the University. **All proposals must be submitted in accordance with the following timelines.**

Category	Deadline for Submission to ORI (to guarantee on-time submission)
Matching Fund Requests	Three (3) weeks prior to sponsor deadline.
Electronic and Paper Submissions	<p>At least two (2) business days before the sponsor deadline for compliance review</p> <p>Final (ready to submit) versions of proposals must be released to the Office of Research for submission no later than noon two (2) days before the sponsor’s deadline date to ensure submission.</p> <p>Once released to the Office of Research, proposals will be submitted in the order they are received.</p> <p>Same-day submission cannot be guaranteed for any application released to the Office of Research after 9:00 a.m. on the deadline day.</p> <p>This timeframe provides an opportunity for Office of Research staff to review the</p>

	<p>electronic application for necessary files, repair corrupted files, and overcome other problems that may preclude timely submission. Office of Research staff are not able to scan files, convert text to PDF, or do other large-scale proposal corrections. PIs should ensure that these requirements are met before releasing the proposal to the Office of Research.</p>
--	--

6.2 Eligibility Criteria for Principal Investigators

Individuals recommended for principal investigator or co-principal investigator status on a research, training, or public service project must possess qualifications which satisfy the general standards of research competence. Individuals recommended as project directors must be competent in the project area.

Individuals with faculty rank or other qualified ASU employees may serve as principal investigators, co-principal investigators, or project directors on proposals submitted to any outside funding agency in support of research, training, or other sponsored activities. Candidates for these leadership roles must have appropriate academic or experiential credentials and must have primary responsibility for the design, execution, and management of the project. Requests that are based solely upon rank or position will not be considered.

Candidates for principal investigator et al, obtain the approval of the Department Chair and the Dean or equivalent administrators to serve in a leadership capacity during the grant or contract submission process. Candidates, however, are strongly encouraged to talk to their chairs or comparable administrators well in advance of grant submission.

The review process should include consideration of the overall merits of the program and whether it: 1) assists the department and the University to achieve their educational, research, or public service goals; and 2) makes use of University resources in a manner that is consistent with departmental goals and objectives

6.3 Delegation of Principal Investigator Responsibilities

Primary responsibility for a project is vested in principal investigators, co-principal investigators, and project directors and may not be relinquished nor delegated explicitly or implicitly without the support and direction of the Associate Vice Chancellor for Research and the sponsoring agency.

6.4 Cost Sharing/Matching

ASU recognizes that certain grant, contract, and cooperative agreement awards may require cost sharing, either through the use of internal funds, in-kind resources, or other external sources. Including cost sharing in a proposal may increase the likelihood that a project will be funded and demonstrates the University's commitment to the project. However, cost sharing implies at least some redistribution of department or school resources to support a specific sponsored agreement. Because these resources are often scarce, it is important not to over-commit funds when the sponsor does not require them and when the project can be completed without them. It should also be noted that cost sharing commitments have an effect on calculation of the University's Facilities and Administrative rate since they are included in the research base and excluded from F&A recovery.

To be included as cost share, proposed expenses must be:

- allowable and allocable under the federal regulations and the terms of the sponsoring agency;
- necessary, reasonable, and directly related to the project objectives;
- verified and recorded in the University's accounting records.

Commitment of University funds or in-kind resources for cost-sharing purposes must be approved by the department chair, dean, and Associate Vice Chancellor for Research before a proposal is submitted.

7.0 RESPONSIBILITIES

7.1 Proposal Preparation and Grant/Contract Administration

7.1.1 Office of Research responsibilities include:

- Reviewing all proposals for external support and for any necessary changes to ensure compliance with University policies and sponsor regulations,
- Authorizing proposal submissions, as long as their submission is consistent with the timelines set forth in this document,
- Negotiating award conditions with external sponsor representatives, and
- Accepting awards on behalf of ASU.

7.1.2 Principal Investigator Responsibilities

Pre-award responsibilities include

- Notifying the appropriate personnel in the Office of Research as early as possible prior to submission of proposals to external agencies;

- Completing proposal/application in compliance with sponsor's guidelines and requirements;
- Developing project design;
- Attending to all compliance issues including, but not limited to transportation limitations and export controls; protection of human research subjects; animal care and use; all safety concerns (e.g., radiation, biohazards, laser; and general laboratory); and disclosure of potential or real conflicts of interest in research;
- Obtaining all necessary institutional approvals for submission of a proposal (e.g., Chair, Dean, ORI, Finance, and any other required approvals);
- Submitting annual conflict of interest in research disclosure materials and update any apparent or actual conflict of interest in research issues that may arise between annual disclosures;
- Developing accurate proposal budgets containing only allowable, allocable, and essential expense items;
- Determining effort for key personnel;
- Notifying the Chair and Dean of any released time or absences that will result if the proposal is funded, and obtain appropriate approvals for this time;
- Coordinating required cost sharing or matching funds (including tuition waivers) with Office of Research, and obtain appropriate approvals;
- Obtaining scope of work, budget, and institutional approval from any external subcontractors five (5) days in advance of the sponsor's deadline date;
- Submitting proposals, subcontract documentation, and the completed Transmittal Form with signatures of co-investigators and all appropriate Chairs and Deans to the Office of Research for review and approval in accordance with the timelines specified in Section 4.0 of this document; and
- If paper submissions are required by the sponsor, assuming responsibility for submitting the correct number of copies to the agency and mailing/delivering the application by the agency deadline.

The principal investigator's post-award responsibilities include:

- Supervising and maintaining progress of the technical aspects of the project to ensure the responsible and ethical conduct of activities according to award document and in compliance with University, sponsor, and local, state, and federal government requirements;
- Devoting effort to the project at the level agreed to with the sponsor;
- Ensuring all compliance issues are met for all key personnel including, but not limited to, conflict of interest in research reporting; effort reporting, and training in the protection of human subjects, animal care and use, and environmental safety;

- Maintaining high-quality, accurate records of research for a period not less than the period of time that the sponsor requires;
- Maintaining research integrity, including the management of activities of project personnel;
- Ensuring responsible management of expenditures in accordance with awarded budget that are allowable, allocable, and essential, and ensuring that any budget changes or alterations are consistent with sponsor and University guidelines (excessive expenditures are the responsibility of the PI/PD and will be charged to a departmental account);
- Selecting, training, and evaluating project staff and providing necessary input and guidance to all students, post-doctoral fellows, staff, and research assistants to ensure the integrity of the project and compliance with sponsor and federal guidelines:
- Informing staff of all University and sponsor guidelines and regulations,
- Ensuring that project staff have the knowledge, resources, and tools necessary for the responsible conduct of research and the technical needs of the project;
- Managing acquisition of equipment, supplies, and personnel according to sponsor guidelines and University policies and procedures;
- Disclosing and managing intellectual property in collaboration with the Office of Innovation and Intellectual Property;
- Fulfilling all reporting requirements, both University and sponsor, in a timely manner, including:
 - Certifying time and effort on a semi-annual basis,
 - Certifying expenditures quarterly,
 - Submitting annual conflict of interest disclosures,
 - Monitoring conflicts of interest in research and immediately disclosing changes in actual or apparent conflicts,
 - Fulfilling sponsor reporting requirements, including technical progress and final reports, and
 - Working with the Office of Sponsored Programs to close the project at the end of the grant period; and
 - Analyzing and publishing findings.

5.3 Departmental Chair and School/College Dean Responsibilities

The Department Chair(s) and School/College Dean(s), or other appropriate unit head(s), review and approve the proposal in a timely manner, paying particular attention to any cost sharing that is included in the proposed budget, especially as it relates to the percentage of effort that a faculty member is devoting to the project. By signing the transmittal form, unit heads certify that they approve of the project, the involvement of the PI and other investigators and students (including released time), the budget, cost sharing, and any other considerations described in the proposal and the Transmittal Form.

5.4 Awards Not Reviewed Prior to Submission

Awards for proposals that have not undergone proper review may encounter compliance problems with University or sponsor policies. The University reserves the right to decline an award that is not compliant with institutional, sponsor, or government regulations.

5.5 Authorized University Signatory

The Associate Vice Chancellor for Research and Innovation and designees are the official University signatories. **Deans, Department Chairs, and individual faculty and staff are not authorized to sign application forms on behalf of the University.**

8.0 PROCEDURES

8.1 Proposal Submission

8.1.1 Contact the Office of Research

PIs should contact the Office of Research as early as possible prior to submission of proposals to external agencies. ORI staff provides assistance with the review of proposals and projects to ensure compliance with University policies and sponsor regulations.

When funding is sought from an individual, please contact the Office of the Vice Chancellor for Development.

- PIs should provide as much of the following information as possible at first contact:
- A summary of the proposed project,
- The name of the funding agency and program,
- Copies of program guidelines, RFPs, RFAs, etc.,
- The deadline for submission,
- Special needs such as matching funds, tuition waivers, or use of institutional resources,
- The need for protection of human subjects, animal care and use, biohazards , or other safety approval, and a plan for obtaining that approval, and
- Evidence that the appropriate unit heads support the project.
- PIs must develop budgets that are accurate, reasonable, and adequate for the proposed project. The budget must follow institutional (ASU) and sponsor budget guidelines and, where applicable, all federal and state regulations. It is strongly recommended that investigators work closely with Office of Research staff in this process.
- ORI must approve budgets to both federal and private sources of research support.

-

8.1.2 Obtain Institutional Review and Approvals

PIs and Co-Investigators for both paper and electronic proposal submissions must upload their submissions and all appropriate documentation to the electronic repository and submit the package to their chair or equivalent administrator for approval. Once the chair or equivalent administrator has approved, the package will be transmitted to the Dean or equivalent, and then to the Office of Research for final approval and submission.

8.1.3 Submit the Proposal to the Agency

The authorized University representative has authority for and responsibility to submit the proposals. If an agency requires that a principal investigator submit his/her proposal directly, the PI is responsible for ensuring that s/he has obtained all appropriate approvals, including approval of the authorized signatory for the University.

8.2 Award Acceptance

Usually, notification of an award is sent to the University. However if an award notice is sent directly to the PI, a copy must be sent immediately to the Office of Research for processing. **PIs cannot incur expenses without a University-assigned fund number and budget for a grant or contract. All external funds within the scope of this policy must be set up in a sponsored-program account.**

In most cases, a grant or contract award is made to the University on behalf of the researcher. An authorized University representative must sign a contract to accept the award. Deans, Department Chairs, and individual faculty or staff members are not authorized to sign award documents.

Office of Research and unit business managers will work with Sponsored Programs Accounting to establish a new fund number for a newly awarded grant or contract. The fund will include a line-item budget in accordance with the award budget, funding agency regulations, and University guidelines.

In order to fulfill audit requirements, all official correspondence or contact with the sponsor normally will be made through the Office of Research or the Sponsored Programs Office.

Any significant changes to grants need to be brought to the attention of Office of Research. Significant changes include but are not limited to:

- Changes in PI or PD,
- Changes in effort devoted to the project (see Effort Reporting Policy),

- Budget revisions,
- Extension of grant period, and
- Change in scope of the project.

Any questions regarding this policy or the procedures mentioned herein should be directed to Office of Research and Technology Transfer personnel.
