Hi John,

Thanks for the reminder, and my apologies for not getting back sooner. I'm totally swamped, and this just slipped by. I'm actually up late working on emails, so the timing is perfect. I have only a few minor clarification comments on the attached for you to look at.

Overall, let me say that 1) Wow! I'm so happy and impressed that you have been consulting me on these changes about how it might impact our program. We greatly appreciate the GIS/GPS education that our biology students receive in the College of Agriculture, and I hope this is an avenue for increased linkages and collaboration. 2) I'm so glad to see these changes and updates to the spatial technology aspects of your program. 3) I have recently reworked the BS Environmental Science and BA Environmental Studies programs to include a geospatial focus area (under department curriculum committee review right now), and I see that I will need to update this further given your course name change to Advanced GIS. I have attached the proposed check sheets here for our reworked degree programs.

Thanks again for reaching out to me on this, and I look forward to having our students take your classes.

Best,

Travis

Subject: URGENT: RE: would like your opinion on this version of my AGST curriculum changes

Travis,

They are pressuring me that I don't have any evidence on your opinion on my changes.

I must get evidence to the UCC by tomorrow.

Importance: High

Travis,

I would like to document your opinion on this version of the changes I am making to our curriculum.

Please send me something I can pass up which states your opinion on the attached changes (mainly this is for AGST 3543 Fundamentals of GIS/GPS)

Best Regards,

John Nowlin, PhD GISP
