

CARING FOR U.S.

HEALTHCARE

Natan Gomez

45,000

Annual deaths due to lack of healthcare

Healthcare is increasing at 5.5% while GDP at 4.4% Salary will

not be enough

The aging population increasing at an alarming rate Higher

demand: 2000 2010 2020 2030 2040 2050 higher cost

(Peter G. Peterson Foundation, 2019)

100

50

(Physicians for a National Health Program, 2018)

(Lokko et al., 2018)

Global, national and local organizations and insitutions would be benefited

of jobs have been created

But partnerships between these institutions are needed to ensure their proper implementation.

Gene therapy

(Peter G. Peterson Foundation, 2019)

- Stem cell therapy
- Nanomedicine
- Biofabrication

These treatments have been approved in most countries, but not all in the US.

Biotechnology has developed more than **4,000**

human theurapetic drugs, treating even previously uncurable diseases, helping

Million people worldwide and is expected to grow exponentially.

(Ravichandran Vijaya & Viswanathan, 2021; Costa, 2019)

(Ravichandran Viiava & Viswanathan, 2021)
