

How to Locate Firefox Version

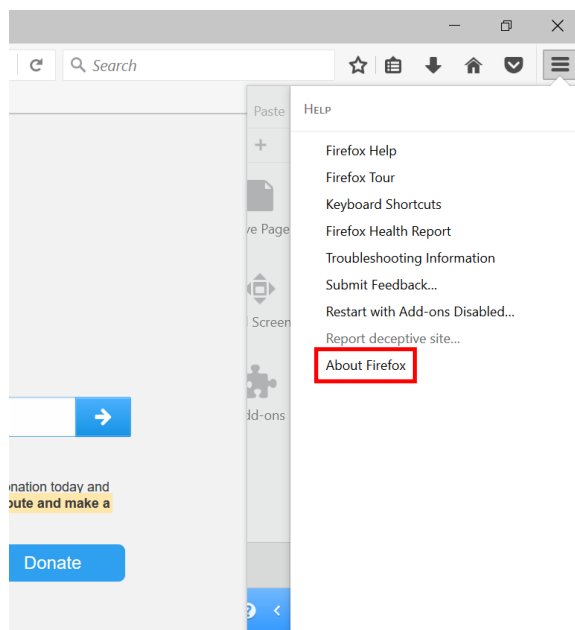

1. Open Firefox on your computer
2. Select the menu button

3. Next, you will need to select the question mark at the bottom of the menu

4. Select **About Firefox**.

5. This will bring up a pop-up that will show you what version of the browser you are using. An update will begin immediately if needed.

6. Once the update is completed, it will ask you to restart the browser to begin using the most updated version.
